

## Information about Master- and Semester projects at the Computer Vision Lab

Dear students

With the following Guidelines we would like to inform you about the procedure, the rules and deadlines for your Master- and Semester projects at CVL. If you have any questions, please contact your (Co)supervisor.

### Start of your Thesis

#### Registration in myStudies

As soon as you got the confirmation of your future Co-supervisor or Professor to start a Master or Semester project at CVL, please register your tproject in myStudies when as all necessary aspects have been clarified (e.g. task description, title etc.). The execution of the project needs to be electronically confirmed by the supervising professor.

#### Working Place in the student rooms

If you would like to use a computer remotely or with a working place at CVL, please inform your (Co-) supervisor.

### Duration of your thesis

Master project: 6 months from the start day of the registration in myStudies.

Semester project **part-time**: 14 weeks from the start day of the registration in myStudies.

Semester project **full-time**: 7 weeks from the start day of the registration in myStudies.

**Please note: In myStudies full-time is set as default value for the Semester thesis!**

### Submission of your thesis

#### Submission Deadline

Please note: The date of the submission deadline given in myStudies needs to be kept **strictly**.

**IMPORTANT:** The following regulations are binding for D-ITET. If you are from another Department please make sure to inform you about the specific provisions of your department!

Please submit your thesis as PDF to your (Co)supervisor. Please add Christina Krueger ([christina.krueger@vision.ee.ethz.ch](mailto:christina.krueger@vision.ee.ethz.ch)) as cc to ensure that the submission of your thesis will be officially registered in the electronic ETH teaching platform.

#### Extension of Submission Deadline

If necessary for important reasons (e.g. illness or accident, missing material required for the project or technical problems related to the project) a written request for the extension of the deadline is necessary. Please use the template attached to this document (attachment 1) or download the form: <https://www.ee.ethz.ch/studies/forms-and-documents.html>. The request of extension needs to be signed by the supervising professor and confirmed by the study director of ITET. If this is positive the submission date will be changed in myStudies.

#### **Please note:**

The request for extension needs to be **signed by your supervising professor** and submitted to the ITET-Student Administration Office **2 weeks before the deadline given in myStudies**. In case of illness this time period can be shorter, but a medical certificate is required for the full period of absence.

### Presentation

Please take care that your (Co)supervisor contacts the CVL responsible and organizes the date for your presentation in time. The presentation needs to be finalized before the grading takes place (i.e. maximum 4 weeks after the submission deadline of your thesis). Please send the slides as PDF to your (Co)supervisor.

### Declaration of Originality

Please read and sign the declaration in time and submit it to your (Co)supervisor. The form attached to this document (attachment 2) or can be downloaded:

<https://www.ee.ethz.ch/studies/forms-and-documents.html>

### Grading Process

The grading will take place maximum 4 weeks after the submission deadline of your thesis if all requirements are fulfilled (see above). CVL-supervisors fill a grading form for their students. The form is attached to this document (attachment 3). Please go through the requirements with your (Co)supervisor at the beginning of your work to get an overview of what is expected and the weight of the different criteria. You need to send **your thesis/report, slides and the declaration of originality** to your CVL-supervisor for giving the grades. The grade can be entered in the electronic system only if these documents are provided to the responsible person.

Your work will be evaluated by a scoring system resulting in your final grade. Please find more details in attachments 4. The document can also be found here:

[https://www.ethz.ch/content/dam/ethz/special-interest/itet/departement/Studies/Forms/20160112\\_Grading\\_System.pdf](https://www.ethz.ch/content/dam/ethz/special-interest/itet/departement/Studies/Forms/20160112_Grading_System.pdf)

### Special Provisions

If you are performing your thesis in specific cooperations with external institutions (Universities, Hospitals, Companies) or under other exceptional conditions, please discuss this in detail with your (co)supervisor. This is important to consider possible issues regarding intellectual property rights or the confidentiality of sensible data.

## Request to extend project / thesis

Submission date \_\_\_\_\_

Full name of applicant \_\_\_\_\_ Stud.-No. \_\_\_\_\_

Supervisor (professor) \_\_\_\_\_

Start date \_\_\_\_\_

Submission deadline \_\_\_\_\_

New submission deadline \_\_\_\_\_ in weeks \_\_\_\_\_

Type of project / thesis: ☐ Semester Project ☐ Master's Thesis

Reason for the request:

☐ technical problems ☐ military service ☐ other  
☐ illness ☐ thesis written abroad

Detailed reasons for the request (compulsory):

This request must be submitted no later than 4 weeks before the submission deadline expires.  
It must be approved by the supervisor (professor) and sent either by email to [info@ee.ethz.ch](mailto:info@ee.ethz.ch)  
or by post to D-ITET Student Administration, Gloriastrasse 35, ETZ H 85, 8092 Zurich.

### Required documents:

Confirmation email or signature of supervisor (professor)

Signature of supervisor \_\_\_\_\_

For the following reasons additional documents are required:

| Reasons for the request | Proof / document to be submitted                                    |
|-------------------------|---------------------------------------------------------------------|
| Illness/accident        | Doctor's note                                                       |
| Military/Civil service  | Copy of «Dienstbüchlein» (military service book) or order to appear |

### Please leave this section blank – Decree of the Director of Studies

☐ Approved ☐ Denied

Statement: \_\_\_\_\_

Date: \_\_\_\_\_ Signature: \_\_\_\_\_

## Declaration of originality

The signed declaration of originality is a component of every semester paper, Bachelor's thesis, Master's thesis and any other degree paper undertaken during the course of studies, including the respective electronic versions.

Lecturers may also require a declaration of originality for other written papers compiled for their courses.

I hereby confirm that I am the sole author of the written work here enclosed and that I have compiled it in my own words. Parts excepted are corrections of form and content by the supervisor.

**Title of work** (in block letters):

**Authored by** (in block letters):

*For papers written by groups the names of all authors are required.*

**Name(s):**

**First name(s):**

|  |  |
|--|--|
|  |  |
|  |  |
|  |  |
|  |  |

With my signature I confirm that

- I have committed none of the forms of plagiarism described in the '[Citation etiquette](#)' information sheet.
- I have documented all methods, data and processes truthfully.
- I have not manipulated any data.
- I have mentioned all persons who were significant facilitators of the work.

I am aware that the work may be screened electronically for plagiarism.

**Place, date**

**Signature(s)**

|  |  |
|--|--|
|  |  |
|  |  |
|  |  |

## Grade Proposal Form for Student Thesis Projects

|                              |                 |                       |                                 |                                         |                               |
|------------------------------|-----------------|-----------------------|---------------------------------|-----------------------------------------|-------------------------------|
| <b>Type of Work:</b>         | Master Thesis ▼ | <b>Project Focus:</b> | <input type="checkbox"/> Theory | <input type="checkbox"/> Implementation | <input type="checkbox"/> Both |
| <b>Title:</b> _____          |                 |                       |                                 |                                         |                               |
| <b>Student's Name:</b> _____ |                 |                       | <b>Student ID:</b> _____        |                                         |                               |
| <b>Degree Program:</b> _____ |                 |                       | <b>Department:</b> _____        |                                         |                               |
| <b>Supervisor:</b> _____     |                 |                       |                                 |                                         |                               |

Each of the individual criteria in this document are to be weighted with an individual score ranging from 1 (min) to 6 (max). The scores are used to compute a grade proposal for the student's thesis. Please note that weighting of the individual assessment criteria differs according to the type of project. For instance, in the first semester thesis, the student's personal commitment is ranked higher than for a master's thesis, where the scientific work (methodology, originality, theoretical work) is in the focus. The sum of the weighted scores divided by 30 generates the grade proposal, which is used as the discussion baseline for the internal grade conference.

| Criteria                                        | Grade | Weights Overview |         |    | Project Weights | Weighted Grade |
|-------------------------------------------------|-------|------------------|---------|----|-----------------|----------------|
|                                                 |       | 1st Sem          | 2nd Sem | MA | Master Thesis   |                |
| Personal work approach:                         |       |                  |         |    |                 |                |
| Effort, personal commitment, interest           |       | 4                | 2       | 1  | 1               | 0              |
| Methodology, problem solving approach           |       | 2                | 3       | 3  | 3               | 0              |
| Initiative, creativity, originality             |       | 2                | 3       | 4  | 4               | 0              |
| Thoroughness, theoretical considerations        |       | 2                | 2       | 3  | 3               | 0              |
| Acquired knowledge, literature, completeness    |       | 2                | 3       | 3  | 3               | 0              |

## ETH Zurich's Grading System and ECTS Grades

The credit system of ETH Zurich is based on the European Credit Transfer Systems (ECTS). Credits are assigned to each learning unit according to the expected student workload. One Credit Point requires an average workload of 30 hours' of student work.

ETH Zurich does not use the ECTS Grading Scheme. The grading scale goes from 1.0 to 6.0 in quarter grade (0.25) steps. The pass grade is 4.0, the maximum grade is 6.0. The numerical grades correspond to the following predicates:

| ETH Zurich Grades <sup>1</sup> |                                        |
|--------------------------------|----------------------------------------|
| 6.0 – 5.75                     | excellent (ausgezeichnet)              |
| 5.5 – 5.25                     | very good (sehr gut)                   |
| 5.0 – 4.75                     | good (gut)                             |
| 4.5 – 4.25                     | satisfactory (befriedigend)            |
| 4.0                            | pass (genügend)                        |
| 3.5                            | fail (ungenügend)                      |
| 3.0                            | poor (schlecht)                        |
| 2.5                            | very poor (schlecht bis sehr schlecht) |
| 2.0                            | extremely poor (sehr schlecht)         |
| 1.0                            | not measurable (nicht messbar)         |

The above grades are not rigidly related to any distribution function and are not awarded according to predetermined percentages or numerical scores. A student's grade in a subject is more related to the student's mastery of the material than to the relative performance of his or her peers.

The ECTS uses a rank-based grading system. In such a "grading-on-the-curve" system, a student's grading is determined in comparison with the whole group's performance. ECTS grades are assigned among students in such a way that the best 10% of the students with a pass grade receive an A, the next 25% a B, etc.

| ECTS Grades <sup>2</sup> |                                           |          |
|--------------------------|-------------------------------------------|----------|
| A                        | excellent                                 | best 10% |
| B                        | very good                                 | next 25% |
| C                        | good                                      | next 30% |
| D                        | satisfactory                              | next 25% |
| E                        | pass                                      | last 10% |
| FX                       | fail – some more work required to pass    |          |
| F                        | fail – considerable further work required |          |

**NOTE:** Although a linear translation might be attempted between ETH Zurich and ECTS grades, any such translation must be interpreted with caution as an ETH Zurich grade does not imply a ranking in a specific percentile. The above tables can be used to translate the grades of individual courses but must not be used for grade-point averages. The ranking of each graduate of ETH Zurich within their cohort is indicated in their academic record in a separate ranking sheet, which indicates the student's grade-point average as well as the mean and standard deviation of the grade-point averages of the cohort.

<sup>1</sup> Terminology according to ETH Zurich's Diploma Supplement.
