

CVL Student Computer Room Guidelines

CVL provides working places in the student room D82.1. We try to provide one working place for each student as far as possible. But sometimes two students need to share a place for a certain time, when the demand is exceeding the number of places available.

Important Contacts:

- CVL Student Admin: Christina Krueger(christina.krueger@vision.ee.ethz.ch/studentrooms@vision.ee.ethz.ch)
- GPU-Access and Data management: Kristine Haberer (khaberer@vision.ee.ethz.ch)

Working in the student rooms:

1. **Duration:** Standard workspace usage durations for D-ITET projects are:
 - Semester Project: 15 weeks
 - Master project: 6.5 months
2. **Extensions:** If the project was extended or more time is required for another reason, the student's supervisor may request an extension for the desk by emailing CVL admin.
3. **Conduct**
 - During the Corona period special rules have to be followed. Students are continuously informed by the CVL Admin Office about the necessary actions/restrictions.
 - The student must keep their desk as tidy as possible at all times, in particular avoiding any accumulation of dirt, binders, paper or any other stuff that affects the work space of the other students in the room.
 - Food and beverages should not be left out over night.
 - Be considerate about the noise you generate: make sure others don't hear your music, go outside for breaks and phone calls, close the door if you play table football.
 - Please do not (ex)change your working place without informing the CVL Admin Office.
4. **Usage of Computers**
 - If the student would like to work predominantly via SSH on a computer, please inform the CVL Admin Office and check the ISG Computing-Website:
<https://computing.ee.ethz.ch/RemoteAccess>
 - Scratch directories: The computer's hard drive is mounted in the folder /scratch. If the computer has a second hard drive it's name is /scratch-second a.s.o. On the student room machines biwidl2xx /scratch is a 500 GB SSD, which should be used for fast read/write access for SGE cluster data exchange. /scratch-second is an ordinary 2 TB hard disk, which should be used mainly for local data storage. Be aware that the data on scratch is **not backed up**.
 - In addition, the scratches of all BIWI workstations are accessible via the so called 'scratch_net' network. The access path is: /scratch_net/\$HOSTNAME. If a scratch-second exists, the path is: /scratch_net/\$HOSTNAME_second a.s.o.
 - On the local /scratch and on any scratch in 'scratch_net' as well, the student must create a folder with his/her username in the form '/scratch_net/\$HOSTNAME/\$USER' and keep all their data there.
 - **The student should use only the scratch directory of the machine they have been assigned.**

- Project accounts for extended data storage:
In case backed-up storage is needed and the student's local storage quota is not sufficient, the student's supervisor should request the creation of a project account for the thesis project (khaberer@vision.ee.ethz.ch).
 - **Do not shutdown the computers!** Other people may be running experiments on them remotely.
 - The student should discuss the best way to set up everything else with their supervisor.
5. **Opening times:** The computer rooms can be accessed always except on one day (will be announced) between 08:15 and 10:00 when 4 machines are needed by the Vision goes Vegas PPS. During that time they have priority.
 6. **IT problems:** For any IT problems that cannot be resolved with the help of the supervisor or by the help of the ISG Website: <https://computing.ee.ethz.ch/> and the CVL Wiki Page: <https://wiki.vision.ee.ethz.ch/>, the student can email support@ee.ethz.ch. Any changes to the student's account (such as expiration date or quota extensions) need to be confirmed by the student's supervisor and by Kris Haberer.

Cleaning up:

1. **The student must delete all their data on all scratches** after having finished their projects. Any data that needs to be preserved should be moved to other locations.
2. All physical stuff (papers, books etc.) is to be removed from the student's desk.
3. All borrowed items (cups, books etc) must be returned.
